Learn More About Penguins!
Check out the Penguin Song video on the Moose Tube channel.

Facts:
• Penguins usually live in snowy areas, close to the sea, and almost all of them live in the southern part of the world called the southern hemisphere.
• Penguins eat krill (small, shrimp-like creatures) or fish.
• Most penguins are endangered, which means there aren't many left on Earth.
• Penguins are excellent swimmers but they can't fly.
• Emperor penguins, like the ones in the picture, are the largest penguins. They stand 4 feet tall and can weigh up to 65 pounds.
